

# Leak Detection Spray

## Description

Leak Detection Spray enables you to find, without effort, any leaking spots of screwed and flanged joints, conduits and welds under internal pressure.

Leak Detection Spray is a non-toxic, environmentally-friendly product. Leak Detection Spray does not form harmful compounds with gases, such as carbon dioxide (CO<sub>2</sub>), propane, butane, acetylene, compressed air, town and natural gas, nitrogen or fluorinated hydrocarbons.

## Universal Application Areas

- not inflammable
- anti-corrosive
- skin tolerant
- tested in Germany DIN EN 14291

Leak Detection Spray helps to save energy and costs everywhere where work is done with compressed air, natural or liquid gas and where leaking spots can occur in fittings, screwed joints and connections.

When applied on air-brakes or gas conduits, it also makes a high contribution towards more safety.

## Directions for use

Shake the aerosol vigorously before use. Expose suspected spots and spray them. Leaking spots are indicated by extremely heavy foam formation. **N.B.: Do not use for testing pipes conducting oxygen.**
